

Electrofusion fittings now sold in pack quantities

From 1st May 2018, our range of universal electrofusion fittings from 20 mm in diameter will be sold in pack quantities. This pack quantity change includes electrofusion couplers, reducers, end caps, equal tees, elbows, tapping tees for gas and water and our range of PurgeTee™ for gas applications.

Electrofusion fittings will be packaged in standardised pack quantities of up to 20 depending on diameter. To avoid

contamination, each fitting will be individually packaged in a sealed bag. Some of our fittings are available in pack quantities or as individual items*.

For more information on this change, please contact your Regional Sales Manager or our Customer Services team on e: sales@radius-systems.com or t: +44(0)1773 811112.
